GATORVATOR®: LESS CABLE, MORE SPEED

Golden's Gatorvator® beamless boat lift offers a more discreet alternative to many post lift installations. Each drive unit is independently mounted directly on the side of the piling, which means they do not need a top beam. One-motor configurations allow for capacities up to 4,000 lbs, Two-motor configurations allow for capacities up to 14,000 lbs and custom configurations allow for capacities up to 30,000lbs. Gatorvator® beamless lifts come with the exclusive patented Golden Sea-Drive®. Purchasing a beamless lift should be a careful decision, as a properly designed one requires more engineering and development than the industry standard 4-Post lifts. Golden's skilled welders, machinists and fabricators use the highest quality materials and latest technology to ensure optimum design, strength, function and aesthetics. Each lift is built specific to fit its owners needs and is available with a multitude of options and accessories including walkway systems, custom bunking, steps, and more.

Gatorvator® Lift Capacity

2,000 - 4,000lbs

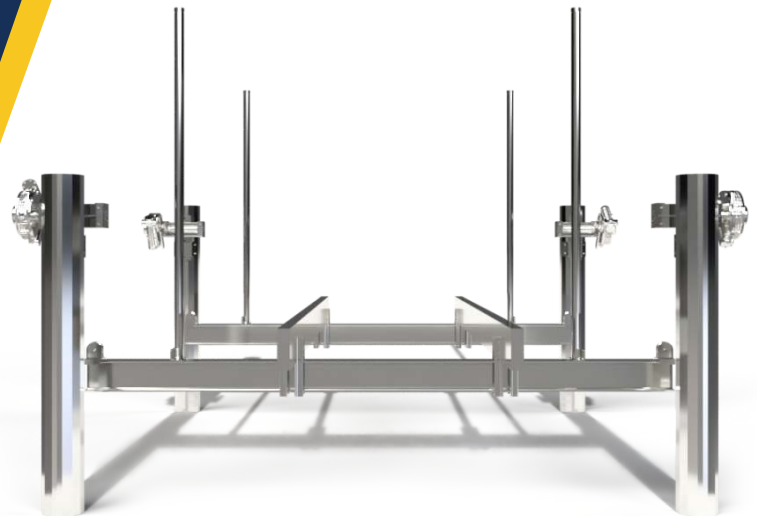

4,000 - 7,000lbs

10,000 - 14,000lbs

16,000 - 20,000lbs

24,000 - 30,000lbs

Larger Sizes Available Upon Request

Gatorvator® Patent: # 6,918,345/6,470,816
Anti-Shear Plate Patent: # 10,189,685
Cable Tie Off Bolt Patent: # 6,719,241
Sea-Drive® Patent: # 7,850,147

FEATURES
